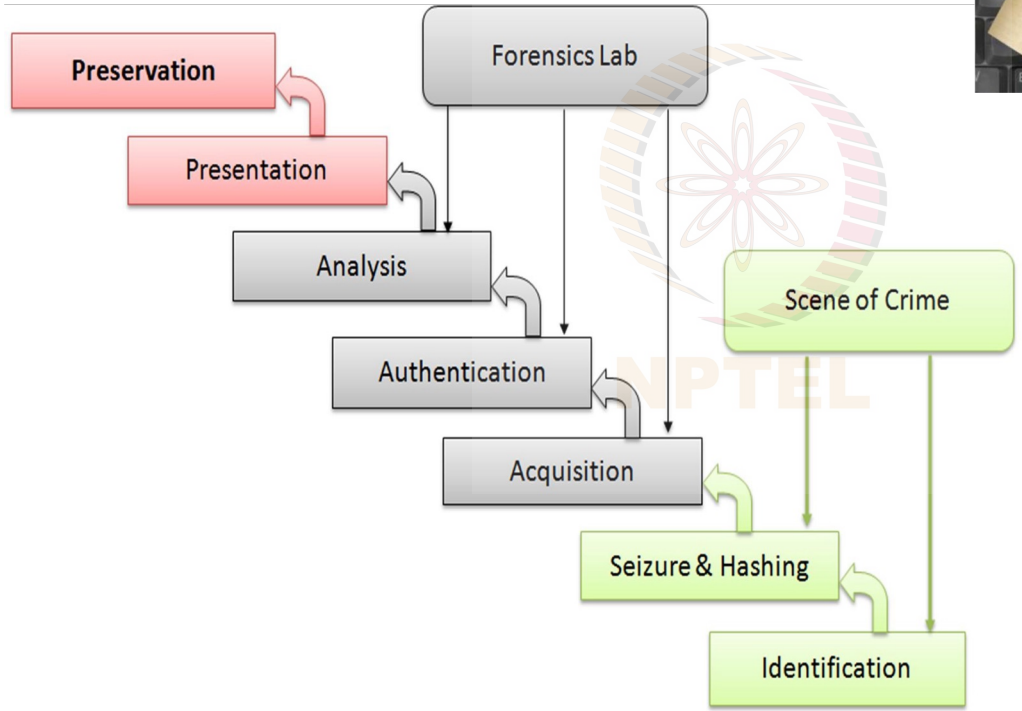
Data about the data

Cyber Forensics Steps



- Memory Forensics
- Mobile Phone Forensics
- Live Forensics
- WhatsApp or APP Forensics
- Audio Video Forensics
- Network Forensics
- Drone Forensics
- Database Forensics
- On site Forensics
- Online Cloud Forensics
- GPS Forensics
- Web Forensics
- Registry Forensics Etc.,

A Legal/Forensic Problem

- Legal Processes
- Rules of Evidence
- Computer Law
- Forensic Principles

Key Concepts

- Evidential Integrity
  - Nothing must be changed on the original
  - Proof of integrity must be available
- Evidential Continuity
  - Must be able to account for all actions at all times involving any and all suspect materials
  - Must maintain accurate handling, record keeping and reporting

The Three Computer Forensic Tasks

- Collection of Data
- Analysis of Data
- Presentation of Data

Information exists on the computer in the form of data.

Data is processed by the computer to produce items such as letters, images or spreadsheets
