Internet Crimes and Cyber Security

Week: 05 **Session: 25**

Topic :SOCMINT Investigation for Social Media Crimes

B Md Irfan
Technical Coordinator (Cyber Security) NALSAR University of Law, Hyderabad

Understanding Social Media Crimes and Fake News

3. Introduction to SOCMINT (Social Media Intelligence) for Investigation

SOCMINT (Social Media Intelligence) tools **help gather and analyze public data from platforms like X, Facebook, TikTok, and Reddit to extract insights on trends, behaviors, and threats, using techniques like sentiment analysis and network mapping**, with popular tools including Maltego, SnapIntel, and various custom scripts on platforms like GitHub, often leveraging AI/ML for large-scale analysis in marketing, security, and investigations.

How SOCMINT Work:

Data Collection: Scraping posts, profiles, comments, and interactions.

Sentiment Analysis: Gauging public opinion (positive, negative, neutral).

Network Analysis: Mapping connections between users and groups.

Trend & Pattern Detection: Identifying emerging narratives and behaviors.

Profiling: Building detailed profiles of individuals or groups.
